

AMENDMENTS TO THE SPECIFICATION

Please delete the present Abstract of the Disclosure and replace it with the following new Abstract of the Disclosure.

Known wired/wireless terminals A wired or wireless terminal for browsing an internet/intranet and ~~comprising~~ including a browser function running via a processor, ~~and~~ a memory for ~~said~~ browsing and ~~comprising~~ a man-machine-interface for controlling ~~said the~~ browser function sometimes completely block (browser-hang-up situation), ~~which can only be changed by switching said terminal off and on.~~ By providing ~~said the~~ terminal with a generator for generating an overrule signal for overruling ~~said the~~ browser function, in case a browser-hang-up situation appears, there is no longer a need to switch ~~said~~ terminal off and on as is conventionally required. ~~Possibly, said~~ The overruling ~~[[is]]~~ may be done in combination with amending ~~said the~~ browsing in response to a response signal originating from a network-unit. Preferably, ~~said the~~ overruling and/or ~~said the~~ amending ~~comprises a~~ includes generation of a previous address signal, and/or a reset of ~~said the~~ browser function, and/or a finish of ~~said the~~ browser function.
